

PRESENTER

TERENCE ROTHWELL - P.ENG

Terence (Terry) Rothwell received his education in Poultry Science, Engineering and Pomology (apple production) at the Ontario Agricultural College (OAC).

For the past thirty-five years, Terry's private sector work has involved practical energy cost-reduction programs, policies and designs for mainly the food, feed and livestock production industries.

Most recently, he was the Project Manager for the design and introduction of the Ontario Power Authority's agricultural *Electricity Retrofit Incentive Program (ERIP)* and the *High Performance New Construction Program (HPNCP)*.

"Education ... is the most important thing that can be done to ensure the profitability, health, security and sustainability of Ontario's agriculture and food systems."

CONTACT INFORMATION

The University of Guelph Ridgetown Campus aims to be a leader in applied agriculture, animal science, and environmental research and in lifelong learning initiatives that are practical and relevant to society.

Tools to Answer Your Own Farm Electricity Questions

COURSE OUTLINE ■ ■ ■

What's On My Electricity Bill?

- Determine what a physically conserved kilowatt-hour is going to save financially.

How Much Electricity Am I Using?

- Measure electricity consumption.
- Determine electricity use for individual tasks.

Can My Electricity Consumption Physically Be Lowered?

- Opportunities for saving electricity exist almost everywhere - the challenge is to identify them.

Is It Financially Possible To Lower My Consumption?

- If the physical possibility to save electricity exists, do I want to act on that saving?

Course also includes:

- Relevant case studies
- Farm examples
- Practical take-home information

COURSE DATES ■ ■ ■

February 18, 2010

Woodstock OMAFRA office

March 2, 2010
